

Flo-Libero

Flo-Libero is part of Rackline's new range of library shelving to suit the needs of the modern library space.

The Flo-Libero system complements our Pro-Libero shelving by offering some of the same features, including a double skin upright.

However its main difference is that the shelving system is mounted onto a movable base with castor wheels. This enables back to back bays to be re-positioned within the Library floor space as layouts and collection themes change, providing full flexibility to the shelving within the working environment.

The Flo-Libero is available in White Smoke RAL 9002 as standard or any RAL colour* and the system can also include options such as; glass tops and book dividers.

Flo-Libero shelving is available in the following heights, depths and widths:

- Heights are available in 900mm, 1200mm, 1500mm and 1800mm.
- Shelf widths available are 900mm, 1000mm and 1200mm, with runs no longer than 2 bays long and all runs to be 2 bays deep.
- Shelf depths are available in 2 x 250mm, 2 x 300mm and 2 x 350mm.

The Flo-Libero is restricted on sizes due to the height to width ratios.
